

- 1 SEATING**
Wood seating with back and armrests is provided in some corner bulbs to provide space for resting and social gathering.
- 2 SIDEWALK**
Sidewalks along Jasper Avenue are a minimum of 2.75m wide, allowing enough space for three people to comfortably pass. Sidewalks are made of concrete to minimize tripping hazards and allows for easy shovelling in winter.
- 3 PLANTING BEDS**
Open planting beds of ornamental grasses and shrubs are provided in the furnishing zone along the length of Jasper Avenue. The planting beds help to separate the pedestrian spaces along the sidewalk from the nearby traffic lanes.
- 4 STREET TREES**
Street trees are provided along the length of Jasper Avenue. Brandon Elm, Autumn Blaze Maple and Bur Oak are the species proposed. Trees are shown at approximately 10 years growth from time of planting.
- 5 LIGHTING**
Pedestrian lighting to illuminate the sidewalk and seating areas. Light fixtures match those used on Jasper Avenue New Vision.
- 6 PLANTED MEDIAN**
A center median is provided between 117 Street and 121 Street. The median contains a planting bed that is raised about 600mm (2') above the roadway to help protect the trees and planting from damage caused by snow clearing and contamination from salt spray during the winter. The median will contain street trees and ornamental grasses.
