

ADAPTABLE CURB EXTENSION

A curb extension extends into the roadway at crossings, either at corners or mid-block, where parking is not permitted. They provide shorter crossing distances and improved visibility for people walking across the street.

Here is a photo of an adaptable curb extension currently installed on Allard Boulevard & Anthony Crescent, as part of the Allard Street Lab.

PARKING ADJUSTMENTS

Both Epark and no parking sign locations will be adjusted to align with Bylaw 5590, where parking is not permitted within 5 metres of a crosswalk.
