

COMMUNITY FEEDBACK ON DRAFT DESIGN

REFINE: You are invited to help us adapt and adjust the draft design to reflect the vision and guiding principles for the neighbourhood.

OUTCOME: A finalized design is created using this input to inform changes.

COMMITMENT: We commit to considering feedback to **REFINE** the draft design to reflect the Vision and Guiding Principles for the neighbourhood.

REFINE

BUILDING GREAT
NEIGHBOURHOODS
AND OPEN SPACES

Edmonton

This stage involves taking your input from previous stages of public engagement to develop a neighbourhood draft design. We will use the vision, ideas and your priorities along with technical requirements and City policies and programs to create the draft design.

HOW WE CREATE A DRAFT DESIGN

The project team reviews all the input provided at the Options and Trade-offs stage and create a draft design based on public input, technical feasibility and City policies/programs.

Depending on your neighbourhood, options may have been shown in themes such as walking, biking, traffic, and open spaces. During the draft design stage, we take each of the themed improvements and place them in an overall neighbourhood design to ensure they fit together as a system.

The draft design may be an option you have seen before, or it may be something new, as the project team has carefully considers the impacts and has worked to make them better. The draft design has also been reviewed for alignment with the vision and guiding principles, to ensure the improvements will help shape the future of the neighbourhood.

WHAT WE CREATE

The draft design will be illustrated for you on maps and other visual tools so you can see the proposed enhancements for your neighbourhood.

FEEDBACK ON THE DRAFT DESIGN

We will share the draft design with you and ask you questions such as:

- + Is the vision for the neighbourhood reflected in the draft design?
- + Are the neighbourhood priorities reflected in the draft design?
- + What are the positive impacts of the draft design?
- + What are the negative impacts of the draft design?
- + Is the draft design what you expected? Why or why not?

HOW YOUR INPUT IS REFLECTED IN THE REVISED DESIGN?

At the next event the project team will bring out revised designs. You will see more details added to the design as we get closer to construction. Your input will have influenced the details along with technical requirements and city policies/programs.

The **What We Heard** document will tell you what is being shown, what was considered in the finalizing of the design and how public input was used or not used in the decision making.

Notes:

In the next stage of the renewal process, **Cost-Sharing Opportunities**, we will describe the process for local improvements and where to get more information on how this directly impacts you.
