

Community Feedback on Final Design Engagement Summary

Malmo Plains Neighbourhood Renewal

ADVISE

Online Engagement

In October 2020, we hosted **Online Engagement** opportunities for Malmo Plains Neighbourhood Renewal. The engagement opportunities included: a Final Design video, a question and answer forum, an information package and an online survey.

We asked residents to share their feedback on the Final Design to ensure it reflects the Vision and Guiding Principles for Malmo Plains and asked if there is anything new to share that the project team should consider. A video of the Final Design showed the proposed improvements for park spaces and walking, driving and biking connections for Malmo Plains.

Paper copies of the information and the survey were also available upon request.

331 unique video views
640 unique visits to the project webpage

Online Survey and Q&A Tool

An online survey was open from October 15 – 30, 2020 to gather feedback on the Final Design.

Participants were able to ask the project team questions about the Final Design on the project website using the Engage Edmonton Q&A tool.

65 completed surveys
Over 15 questions and comments

The feedback from online engagement will be used, along with technical requirements and City policies and programs, to complete the Final Design for the renewal of the Malmo Plains neighbourhood. A What We Decided Report will be available in early 2021.

The next event will be in February 2021 to discuss Preparing for Construction.

Although the survey is closed for feedback, the Final Design video, information package and the questions and answers are still available to view on the project webpage.
