

## “THANK YOU”

---

The Bulletin is greatly indebted for being enabled to issue as usual this morning, with city utilities all out of commission, to John Beals & Son, who kindly lent the Bulletin two gasoline engines, and to J. M. Payzant, gas engine and automobile expert, who assisted during the night in their operation. Without the aid of these gentlemen the Bulletin would have been entirely without facilities for publication as it is dependent upon electric power for operation of its linotype machines and newspaper press.
