Guide - How to Register with the SAP Business Network

Suppliers can access the City of Edmonton procurement opportunities by creating an SAP Business Network Supplier account on SAP Business Network Discovery. The following details are the required steps to create a SAP Business Network Supplier account.

Note that if you are new to the SAP Business network, your profile may need to be approved by the City of Edmonton before you are able to respond to an opportunity. If you need assistance with your account approval, please email suppliermanagement@edmonton.ca.

Step 1: Verify that your Company is not already Registered with SAP Business Network

Each supplier can only have their company registered **once** on the SAP Business Network. If your company is already registered with SAP Business Network, your administrator will be able to create additional login information for individual users from your company's account. See the City of Edmonton's [Managing your SAP Business Network Supplier Profile](#) guide for further information on adding additional users to the SAP Business Network Supplier account.

Registering your company multiple times, thus creating duplicates or triplicates, will cause delays with registration as well as potential issues receiving purchase orders and submitting invoices in the future. Also, if your company has multiple locations with the same GST number, you must decide who the account administrator will be as SAP can only have a relationship with one account. From there POs will identify the location they are ordering from on the PO header section.

Step 2: Access SAP Business Network

If your company has not already registered with SAP Business Network, navigate to the [SAP Business Network Discovery website](#).

Step 3: Initiate Account Creation

3. 1. Click **Register as Supplier**.

SAP Business Network Discovery postings are matched to the product and service categories selected. Your organization will receive notifications of potential opportunities to bid based on these categories.

Choose broader categories rather than the exact products or services by name to ensure that you gain exposure to more opportunities. If the products or services that you offer can be classified in multiple ways, select all possible categories to ensure better matches.
