## Bulletin

March 4, 2021

City of Edmonton - Valley Line West LRT Project

The City of Edmonton has shortlisted three participants in its procurement for 40 light rail vehicles (LRVs) for the Valley Line West LRT project.

The City's Request for Qualifications (RFQ Sourcing Event 2709919135) closed on Feb. 4, 2021. The City received eight submissions which were carefully reviewed by an evaluation committee, shortlisting the following three participants:

- Construcciones Y Auxiliar De Ferrocarriles, S.A. (CAF Group)
- Hyundai Rotem Company
- Siemens Mobility Ltd.

The shortlisted participants will be invited to take part in the next stage of the procurement process, which is expected to conclude with the selection of a successful bidder by the end of 2021.

The 27-km Valley Line is the City of Edmonton's largest LRT investment to date, providing continuous transit operations between Mill Woods in the city's southeast through Downtown to Lewis Farms in west Edmonton. The project is being delivered in two stages:

- Stage One: The 13-km Valley Line Southeast, from Mill Woods to Downtown Edmonton. It is currently under construction and is being delivered as a Public-Private-Partnership.
- Stage Two: Valley Line West, a 14-kilometre LRT extension from Downtown to Lewis Farms, with terminus at Lewis Farms Transit Centre. Following the conclusion of its procurement process, the City selected Marigold Infrastructure Partners for the design-build-finance contract. Construction begins in 2021.

The LRVs will provide bidirectional, articulated, low-floor service that is compatible with both stages of the Valley Line, ensuring a seamless rider experience. The Valley Line requirements include operations in both segregated and mixed traffic rights of way in Edmonton's winter climate.
